LEARNING OBJECTIVES:

- 1 Explain the importance of proper storage and handling of vaccine and list key equipment requirements.
- 2 Summarize forecasting and locate the most up-to-date vaccine schedule for adults and children.
- 3 Describe the most common errors related to vaccine administration.
- 4 List the seven rights of vaccine administration.
- 5 Describe best practices for administering subcutaneous and intramuscular vaccine to adults and children.
- 6 Describe the relationship between trust and professionalism as it relates to patient experience.

E-LEARNING ACTIVITY

Vaccine Training for Medical Assistants

PRESENTED BY

Virginia Chambers, CMA (AAMA), BS, MHA
Program Director, Department Faculty Chair, and
Clinical Coordinator, Portland Community College,
Medical Assistant Program

ABOUT THIS E-LEARNING COURSE

We understand that the knowledge and skills of entry-level medical assistants widely differ, as there is no standard vaccine training curriculum for Medical Assisting schools. This course is approximately 1 hour in length, and is designed for entry-level medical assistants.

Register today to learn about best practices for vaccinations, including storage and handling, locating vaccine schedules, rights of administration, and guidance on how to administer vaccine properly to various populations.
