

CHILDHOOD VACCINATION TOOLKIT FOR SCHOOLS

Dear schools serving children age 4 to 18,

Routine childhood vaccination rates dropped dramatically during the early months of the COVID-19 pandemic. Vaccination rates began rebounding last summer, but many children and adolescents are still behind on their recommended immunizations. The drop in childhood vaccinations may raise the risk of other disease outbreaks when schools fully reopen this fall.

As we prepare for the 2021-2022 school year, please help remind parents of the necessity and importance of completing childhood vaccinations. We have compiled a toolkit of materials to help you promote childhood vaccines, answer parent questions, and more.

Additionally, the Pfizer COVID-19 vaccine is now available for children ages 12 and older in Washington state. It can be given at the same time as other vaccines, so please recommend the COVID-19 vaccine for any qualifying child as you are catching them up on other immunizations. If you don't offer COVID-19 vaccine, you can refer their parents to www.VaccineLocator.doh.wa.gov to find a nearby provider.

Sample Letter (Childhood Vaccines)

Catch up on childhood vaccines

[Insert date]

Dear Parent or Guardian,

The Department of Health (DOH) and the [school/school district] recommend eligible children get all required and recommended childhood vaccinations as soon as possible so they can return to normal activities such as in-person learning, sports, and visiting friends. We encourage parents of all school-age children in pre-kindergarten through 12th grade to stay on schedule with their required and recommended vaccinations, especially if they have missed vaccines or well-child visits over the past year. **All students, including those learning remotely, need to be in compliance with immunization requirements when school starts in the fall.** Information about school and child care requirements can be found at www.doh.wa.gov/SCCI and questions can be sent to OICPSchools@doh.wa.gov.

Over the summer, families with children aged 4 to 6 who are missing vaccine doses, according to their record in the Washington State Immunization Information System, will receive a letter in the mail from the DOH with information about which vaccines their child may be missing. (For all other ages, check what vaccines your child may be missing at www.MyIRmobile.com.) Also included with the mailing will be a copy of the [Required Immunizations for School Year 2021-2022](#).

The mailing will also encourage parents to make sure older children in the home are up to date with their vaccinations, including a Tdap dose at age 10 or older if they are entering 7th or 8th grade in the fall. Children age 12 and up are also now eligible for the Pfizer COVID-19 vaccine, but it's possible younger children may be eligible for this vaccine as early as fall 2021. The COVID-19 vaccine can be received at the same time as any other vaccine.

To prepare for the next school year, we encourage parents to schedule wellness visits with their health care provider early. If you have questions or concerns about vaccinations, we suggest talking with your health care provider.

Sincerely,

[Insert school signature block]

[Insert school header]

Sample Letter (School Vaccination Clinic)

Expanded ages for COVID-19 vaccine

[Insert date]

Dear Parent or Guardian,

In Washington state, children age 12 and up can now get their COVID-19 vaccine. To make it easier for our students to access COVID-19 vaccine, we are hosting a school vaccination clinic.

We will have a school vaccination clinic offering 1st or 2nd doses of Pfizer COVID-19 vaccine for students ages [XX-XX] on the following dates and times:

[XX:XXam/pm to XX:XXam/pm on [weekday, month day, 2021]

[XX:XXam/pm to XX:XXam/pm on [weekday, month day, 2021]

[XX:XXam/pm to XX:XXam/pm on [weekday, month day, 2021]

Registration: Parents/guardians can register their children for a time slot by [registering online at/calling XXX-XXX-XXXX]. [If no registration: Vaccinations will be given on a first come first serve basis, but we plan to have enough vaccine for all students that show up.] When you arrive, please [go here/wait at this spot/call this number].

Consent: Parents/guardians will need to provide consent for their children by [details]. Students age 18 and up or who are 16 or 17 and emancipated may provide their own consent for vaccination by providing the relevant ID or paperwork.

Vaccine Recommendation: The Department of Health (DOH) and the [school/school district] recommend eligible children get vaccinated against COVID-19 as soon as possible so they can return to normal activities such as in-person learning, sports, and visiting friends.

The Pfizer vaccine is safe and effective two-dose series authorized for adolescents age 12 and up. Adults and children may experience some common side effects 1 to 3 days after vaccination, including sore arm, tiredness, or headache. You can report any vaccine reactions through VAERS.hhs.gov or V-safe at vsafe.cdc.gov (available in five different languages).

Questions: If you have questions or concerns about COVID-19 vaccination, you may give us a call at [phone] or check out the DOH website on COVID-19 vaccination at www.CovidVaccineWA.org.

Sincerely,

[Insert school signature block]

STATE OF WASHINGTON • DEPARTMENT OF HEALTH
Office of Immunization

Sample Letter of DOH Mailing to Parents

Children age 4 to 6 (English)

Dear Parent or Guardian,

According to the Washington State Immunization Information System, your child is missing one or more of the immunizations needed to start school. The list below shows the vaccine(s) that are due for your child. This letter includes an important flyer on Required Immunizations for School Year 2021-2022. **All students, including those learning remotely, need to be in compliance with immunization requirements when school starts in the fall.** Please contact your child's health care provider to discuss how to get your child up to date on their vaccines.

Vaccine(s) Due for [XXXXXXXXXXXX]:

[1. vaccine] [2. vaccine] [3. vaccine] [4. vaccine] [5. vaccine]

If you think your child is up to date on all of their immunizations, please check with your health care provider to make sure. You can always access your family's immunization records for free at **MyIRmobile.com**. Immunization forms and other information about school requirements are available at **doh.wa.gov/SCCI**.

Washington state provides all recommended vaccines at no cost for children through age 18. These vaccines are available from health care providers and some pharmacies across the state. Families who do not have a health care provider already can call the **Help Me Grow WA Hotline at 1-800-322-2588** or go to **ParentHelp123.org** to find a health care provider, clinic, or other health resources. This service is free and language assistance is available.

If you have older children in your household, please make sure they are also up to date. The Tdap vaccine at age 10 or older is required for 7th grade entry, and HPV and meningococcal vaccines are recommended at this age too. Right now, children age 12 and up can get the COVID-19 vaccine. We expect younger kids may be eligible for this vaccine as early as fall 2021. Parents can schedule all of their child's vaccinations on the same visit. COVID-19 vaccines are available to all eligible children and adults at no cost. Learn more about COVID-19 vaccines at **covidvaccinewa.org**.

Vaccinating children on time is the best way to protect them now and in the future. For information and resources about vaccinations during COVID-19, visit **immunitycommunitywa.org**. Thank you for keeping our communities safe, healthy, and vaccinated as schools reopen in the fall!

Sincerely,

The Washington State Department of Health
Office of Immunization

*PO Box 47843 • Olympia, Washington 98504-7843

STATE OF WASHINGTON • DEPARTMENT OF HEALTH
Office of Immunization

Sample Letter of DOH Mailing to Parents

Children age 4 to 6 (Spanish)

Estimado padre o tutor,

De acuerdo con el Sistema informático de Inmunización del Estado de Washington, a su niño le falta una o más de las vacunas necesarias para comenzar la escuela. La siguiente lista muestra las vacunas que su niño tiene pendientes. Incluimos un folleto importante sobre Vacunas Requeridas para el Ciclo Escolar 2021-2022. **Todos los estudiantes, incluidos los que aprenden a distancia, necesitan cumplir con los requisitos de inmunización cuando la escuela comience en el otoño.** Comuníquese con el médico o clínica de su niño para saber cómo ponerle al día con sus vacunas.

Vacunas Pendientes para [XXXXXXXXXXXX]:

[1. vaccine] [2. vaccine] [3. vaccine] [4. vaccine] [5. vaccine]

Consulte con su médico o clínica para asegurarse de que su niño este al día con sus vacunas. Tenga acceso gratuito a los registros de inmunización de su familia en **MyIRmobile.com** (*sólo en inglés*). Los formularios de vacunación y otros requisitos escolares están disponibles en **doh.wa.gov/SCCI** (*sólo en inglés*).

El estado de Washington provee todas las vacunas recomendadas sin costo para niños hasta los 18 años. Estas vacunas están disponibles por medio de su médico, clínica y algunas farmacias en todo el estado. Las familias que no tienen un médico pueden llamar a **Ayúdame a Crecer WA línea directa al 1-800-322-2588** o ir a **ParentHelp123.org/es/** para encontrar un médico, una clínica u otros recursos de salud. Este servicio es gratuito y cuenta con servicio de idiomas.

Si usted tiene niños mayores en su hogar, asegúrese de que también estén al día con sus vacunas. Se requiere la vacuna contra el DTaP a los 10 años o más para ingresar al 7º grado. Las vacunas contra el VPH y el meningococo también se recomiendan a esta edad. Por ahora, los niños de 12 años o más pueden recibir la vacuna contra el COVID-19. Los niños más pequeños podrían ser elegibles para esta vacuna tan pronto como el otoño del 2021. Los padres y tutores pueden programar todas las vacunas de su niño en la misma visita. Las vacunas contra el COVID-19 están disponibles para niños y adultos elegibles sin costo alguno. Más información sobre las vacunas contra el COVID-19 en **vacunadecovidwa.org**.

Vacunar a los niños a tiempo es la mejor forma de protegerles ahora y en el futuro. Para información y recursos sobre las vacunas contra el COVID-19 durante la pandemia, visite **cdc.gov/vaccines/parents/index-sp.html**. ¡Gracias por mantener a nuestras comunidades seguras, saludables y vacunadas en la reapertura de las escuelas en el otoño!

Saludos cordiales,

El Departamento de Salud del Estado de Washington
Oficina de Inmunización
