

Access essential resources and links below for COVID-19, HPV, and RSV vaccines to stay updated with current information and guidelines.

## COVID-19 Vaccines

For the most up-to-date information for Washington State on COVID-19 go to the [Washington Department of Health's webpage](#).

### COVID-19 Vaccine Administration Quick Reference Tables

[COVID-19 Vaccine Immunization Schedule](#)

[COVID-19 Vaccine Vial Information](#)

COVID-19 vaccines are one of the four vaccines recommended during pregnancy to protect both the birthing person and baby. Review the following link to learn more:

[Pregnancy and COVID-19 Vaccine Toolkit](#)

It is important to know that CDC now recommends adults ages 65 years and older receive an additional updated COVID-19 vaccine dose at least 4 months after their initial 2023-2024 dose.

[Older Adults and Additional 2023-2024 COVID-19 dose](#)

CDC also recommends [2024-2025 COVID-19 vaccine for everyone 6 months and older](#) when vaccines are available in fall 2024.

## HPV Vaccine

Research studies have shown that initiating HPV vaccine series at age 9 is most effective for several reasons, including a robust immune response in preteens, long-lasting protection against the most common HPV-related cancers and infections, immunity established before any exposure to the virus, higher completion rate of HPV-vaccine series when started at age 9 or 10 compared to 11 or 12, and an easier conversation with parents focusing on cancer prevention benefits of vaccine than discussions of sexuality.

Interested in learning more about the HPV vaccine and prevention efforts in Washington State? Learn more about the [Washington State HPV Free Taskforce](#) and how to get involved.

## RSV Immunizations

As of 2023, there are three immunization products available to infants, pregnant people, and older adults for protection against Respiratory Syncytial Virus (RSV). As an immunizer, it's important to stay up to date with the newest developments and resources available to fight vaccine preventable diseases, use the following links and resources to familiarize yourself with Arexvy, Abrysvo and Nirsevimab.
